

Medical Assistance in Dying (MAiD)

At Lisaard & Innisfree Hospice, we believe that people have a right to die with dignity, free from pain, surrounded by their loved ones in a setting of their choice. Our focus is on symptom management and improving quality of life through a holistic, person-centered approach to care for those living with a life-limiting illness. Hospice palliative care sees dying as a normal part of life. It does not seek to hasten death or intentionally end life; rather, it helps people to live well and die well.

Lisaard & Innisfree Hospice respects an individual's autonomous decision to choose medical assistance in dying. Where this choice is made, we will make appropriate referrals to honor this choice, and we will continue to provide compassionate palliative care in the hospice through end-of-life.

Support will continue to be provided to an individual's family and friends through our aftercare process, bereavement programs and services.
